About ICPHD 2026

Welcome to the 4th Edition of the International Conference on Petroleum, Hydrogen, and Decarbonization (ICPHD), organized by the Department of Petroleum Engineering and the Department of Chemical Engineering, Pandit Deendayal Energy University (PDEU), Gandhinagar. The conference brings together leading experts, researchers, academicians, industry professionals, and young researchers to explore cutting-edge developments in petroleum, hydrogen, and decarbonization. As we navigate an era marked by the urgent need for sustainable energy solutions, ICPHD focuses on the advances, challenges, and opportunities shaping the future of the energy sector, aiming to highlight recent innovations and address emerging challenges through technical presentations, panel sessions, and knowledge sharing.

The conference provides a platform for researchers, industry professionals, academicians, and students to exchange ideas, showcase their work, and foster meaningful collaborations toward a future powered by advanced technologies and a strong commitment to sustainability.

About the Departments

The conference is jointly organized by the Department of Petroleum Engineering and the Department of Chemical Engineering, Pandit Deendayal Energy University. The two departments represent complementary domains that play a vital role in the energy and process industries, with a shared focus on innovation, research, technology development, and sustainable solutions.

The Department of Petroleum Engineering focuses on the exploration, production, processing, and management of petroleum resources while addressing the evolving challenges of the energy sector, encouraging students and researchers to develop innovative solutions across the upstream and broader energy industries.

The Department of Chemical Engineering and Che combines fundamental sciences and engineering principles to address challenges across chemical processing, energy, petroleum refining, materials, and other industrial applications, promoting interdisciplinary research, industry collaboration, and sustainable development.

Together, the two departments provide a strong interdisciplinary platform for ICPHD, bringing together expertise from petroleum, chemical, hydrogen, energy, and decarbonization domains to facilitate the exchange of knowledge and encourage technological advancements for a sustainable energy future.

About the Institute

Pandit Deendayal Energy University (PDEU), located in Gandhinagar, Gujarat, is a leading institution dedicated to education, research, innovation, and human resource development in the energy sector, bringing together engineering, science, technology, management, and other allied disciplines.

With its strong focus on energy education and research, PDEU aims to develop skilled professionals and researchers capable of addressing the evolving challenges of the global energy landscape, promoting innovation, interdisciplinary collaboration, industry interaction, and research-driven learning.

PDEU's academic and research ecosystem is supported by its schools, departments, laboratories, industry collaborations, and academic partnerships, providing an appropriate platform for a conference dedicated to petroleum, hydrogen, and decarbonization.

Through ICPHD, PDEU continues its commitment to bringing together academia, industry, researchers, and students to exchange knowledge, foster collaboration, and explore innovative pathways towards a cleaner, sustainable, and resilient energy future.
